Nisarga Batika School | For Experiential Learning

School Facilities

Nisarga Batika School | For Experiential Learning

Nisarga Batika school is divided into four levels – Preschool, Junior Elementary, Senior Elementary, and the High School. It is spread across some 125,000 sq. ft of land and over 40,000 sq. ft of built up activity rooms and classrooms, has two swimming pools, two basketball courts, lots of open spaces, and separate pre-school, elementary school and high school infrastructures.

Situated at Rabi Bhawan, Kathmandu, Nisarga Batika High School is hosted in a separate dedicated building and and ground area with all the necessary amenities. The school's campus overs over 23 ropanis of land and more than 40,000 sq. ft. of classrooms, covered halls and recreational spaces. The students have access to many facilities based on their interests: 2 swimming pools (a 25 meter and a 16-meter pool); 2 basketball courts; 3 computer labs; elementary and high school science labs; 2 STEAM labs; separate libraries for different grades; Amphitheatre; separate visual and performing arts block; dedicated eating and cafeteria areas and 28 vehicles for student transportation fleet.

Nisarga Batika School | For Experiential Learning

Separate infrastructure for the preschool was developed in the year 2017, and the development of the high school wing infrastructure was finished in 2021. The infrastructure for the school and its students has been an ongoing part of development at the Nisarga Batika School. It has been able to establish itself as well sought-after school in the country with an environment promoting quality class time, teacher attention and enrichment activities necessary for the kind of education they desired for their children.

With around 600 students and over 150 faculty and staff, our programs are designed towards providing a progressive educational environment that places a priority on experiential learning.
